

Index	Seite
Introduction	7
List of symbols	9
1 BASIC EQUATIONS	11
1.1 Equations of thermodynamics	11
1.2 Equations of motion	11
2 RELATIONS BETWEEN WIND, PRESSURE AND TEMPERATURE FIELDS	13
2.1 Order of magnitude of synoptic systems	13
2.2 Hydrostatic equilibrium	13
2.3 Forms of equilibrium with horizontal motion	14
2.4 Trajectories and streamlines	16
2.5 Pressure as vertical coordinate	18
2.6 Vertical change of the geostrophic wind	19
2.7 Temperature advection and local temperature change	20
2.8 Changes in vertical stability	22
2.9 Vertical structure of pressure systems	23
2.10 Ageostrophic wind components	24
2.11 Dynamic stability	27
3 PRINCIPLES OF DYNAMICS	29
3.1 Characteristics of the horizontal wind field	29
3.1.1 Translation	29
3.1.2 Deformation	29
3.1.3 Divergence	31
3.1.4 Rotation (vorticity)	33
3.1.5 Computation of vorticity	35
3.2 The equation of continuity	35
3.3 The pressure tendency equation	37
3.4 The vorticity equation	38
3.5 Potential vorticity	40
3.6 Circulation and circulation theorem	41
4 AIR MASSES	44
4.1 Origin, classification and characteristics of air masses	44
4.2 Air mass transformation	46

5	FRONTS AND FRONTAL ZONES	49
5.1	Conditions of equilibrium on front surfaces	49
5.2	Conditions of equilibrium on frontal zones	50
5.3	The structure of the polar front	52
5.4	Classification of surface fronts; front movement	56
5.5	Appearance of fronts	57
5.6	Front models	60
5.6.1	Warm fronts	61
5.6.2	Cold fronts	62
5.6.3	Occluded fronts	64
5.6.4	Mesoscale structures in the area of frontal systems	65
5.7	Front analysis	65
6	JET STREAMS	68
6.1	Appearance	68
6.2	Horizontal and vertical wind shear	69
6.3	Course of the jet axis	70
7	FRONTOGENESIS AND FRONTOLYSIS	73
7.1	General aspects	73
7.2	Frontogenesis and frontolysis in the horizontal wind field	73
7.3	Cross circulations with frontogenesis and frontolysis	74
7.3.1	Theory	74
7.3.2	Application to frontogenetic fields	76
7.3.3	Influence of diabatic heat transfers	79
7.4	Conditions near the ground	81
7.5	Examples of frontogenetic processes	81
8	THE STRUCTURE OF CYCLONES AND ANTICYCLONES IN THE MID LATITUDES	92
8.1	Historical review	92
8.2	Life cycle of cyclones	93
8.3	Thermal and vertical structure of cyclones during their development	97
8.4	Cyclone families	99
8.5	Anticyclones	99
9	TROPOSPHERIC WAVES	101
9.1	Appearance	101
9.2	Identification and behaviour of long waves	101
9.3	Upper level cyclones and anticyclones	105
